Radon is a naturally occurring, radioactive gas.

- It cannot be seen, smelled or tasted.
- It may seep into your home from the rocks below.
- It is the second leading cause of lung cancer.

**TEST YOUR HOME • KNOW YOUR LEVEL**
For a radon test kit, contact the Kentucky Radon Program at (502) 564-4856.

Certain types of rock have higher levels of radon:
Radon is a problem in many areas in Kentucky, including Knox county.

Different colors show different rock types:
- least danger
- mild danger
- danger
- more danger
- most danger

Smoking and radon:
Breathing radon is dangerous, but it is even *more* harmful when you also breathe tobacco smoke.
In Knox County:

Blue dots show homes already tested for radon. More homes in Knox County need to be tested.

To Do List:

- TEST your home for radon.
- TALK with a health care provider about your results.
- FIX your home if the level is high. Call a certified radon professional.
- ASK people to smoke outside.
- TELL your loved ones about the dangers of radon and tobacco smoke.

TEST YOUR HOME • KNOW YOUR LEVEL
