# FOLLOWING THE TRAIL OF

# RADON

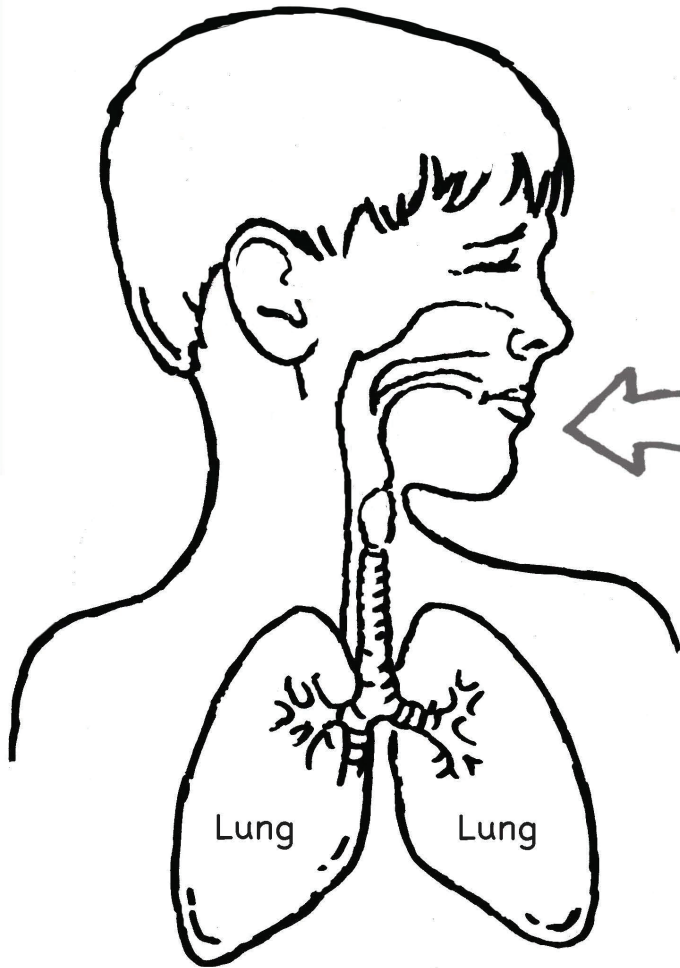

What is radon?

Radon is a radioactive gas that comes from uranium in rock, soil, and water.

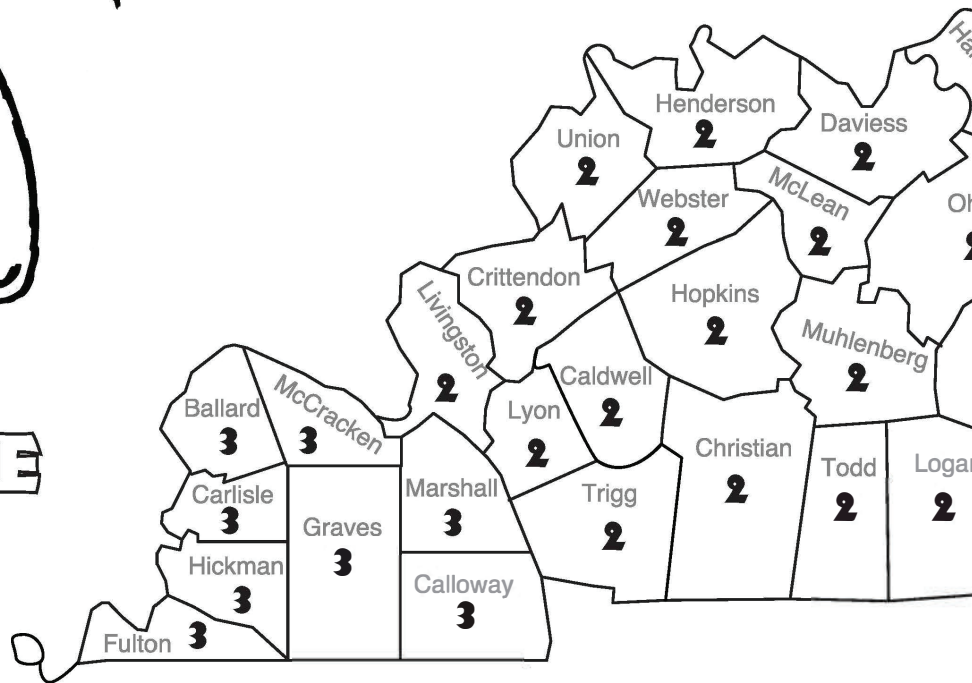

Sometimes radon gas enters a house from **CRACKS** in the foundation and openings around pipes.

**YOU CANNOT SEE, SMELL, OR TASTE RADON,**  
but it is bad for your lungs. Radon gas can cause lung cancer.

Breathing in  
radon decay  
products

**DON'T SMOKE**

**RADON IS EVEN MORE DANGEROUS FOR  
THOSE WHO SMOKE AND THOSE WHO  
BREATHE SECONDHAND SMOKE.**

**DON'T BE AROUND SECONDHAND SMOKE**

# WHAT CAN YOU DO?

**TEST** your home for radon with a radon test kit. If your house has a high radon level, it can be fixed.

**GET** the results.

**FIX IT** if you need to.

A **MITIGATION SYSTEM** is a pipe and fan that helps remove radon gas from your home.
