FAQ's

- Do smokefree workplace ordinances take away smoker's rights?

Secondhand smoke is a public health issue. Exposure to second-hand smoke can cause cancer and heart disease. People have the right to work in a workplace free from this health hazard. Smokers have the right to smoke, but not in ways that harm others.

- Should businesses have the right to choose whether or not to allow smoking?

Protecting the health and safety of the community is one of the main purposes of government.

Businesses have the right to operate as they see fit but they don't have the right to endanger their employees and the public. Businesses are used to a variety of local health and safety regulations for sanitation, food handling and storage, etc. and few business owners would argue against their rationale. Clean air is just as important!
